

# KAKADIYA FABRICS

PLOT NO. 181-182, SHIVANJALI UDHYOG NAGARI, TATITHAIYAGAM, TA. PALSANA, SURAT

---

Date:16.12.2019

TO WHOMSOEVER IT MAY CONCERN

We have installed TSi's VRP precision PWM Static Voltage Regulator of 100KVA before 5 years in our factory.

We were facing frequent tripping issues due to power fluctuations and also faced many PCB card burning issues in our earlier Chinese machines. Then we go with Tsi-VRp and we found drastic change in frequency of tripping and PCB card failures.

Due to Tsi-VRp's excellent performance and fast response ,last year we also installed PICANOL machines which powered by two nos of 100KVA TSi VRp in our new expansion.

We are using TSi VRp since last 5 years and confident that these units will continue to perform well in future also. We are also recommending TSi-VRp to our other textile manufacturers.

We wish good luck to TSi team.

For Kakadiya Fabrics.
